## **Report on**

### **2014 Inspection of Choi, Kim & Park, LLP (Headquartered in Los Angeles, California)**

**Issued by the**

**Public Company Accounting Oversight Board**

**February 26, 2015**

**THIS IS A PUBLIC VERSION OF A PCAOB INSPECTION REPORT**

**PORTIONS OF THE COMPLETE REPORT ARE OMITTED  
FROM THIS DOCUMENT IN ORDER TO COMPLY WITH  
SECTIONS 104(g)(2) AND 105(b)(5)(A)  
OF THE SARBANES-OXLEY ACT OF 2002**

PCAOB RELEASE NO. 104-2015-078A  
(Includes portions of Part II of the full report that  
were not included in PCAOB Release No. 104-2015-078)

**2014 INSPECTION OF CHOI, KIM & PARK, LLP**

Preface

In 2014, the Public Company Accounting Oversight Board ("PCAOB" or "the Board") conducted an inspection of the registered public accounting firm Choi, Kim & Park, LLP ("the Firm") pursuant to the Sarbanes-Oxley Act of 2002 ("the Act").

Inspections are designed and performed to provide a basis for assessing the degree of compliance by a firm with applicable requirements related to auditing issuers. For a description of the procedures the Board's inspectors may perform to fulfill this responsibility, see Part I.C of this report (which also contains additional information concerning PCAOB inspections generally). Overall, the inspection process included a review of portions of an issuer audit completed by the Firm. This review was intended to identify whether deficiencies existed in those portions of the inspected audit, and whether such deficiencies indicated defects or potential defects in the Firm's system of quality control over audits. In addition, the inspection included reviews of policies and procedures related to certain quality control processes of the Firm that could be expected to affect audit quality.

The Board is issuing this report in accordance with the requirements of the Act. The Board is releasing to the public Part I of the report and portions of Part IV of the report. Part IV of the report consists of the Firm's comments, if any, on a draft of the report. If the nonpublic portions of the report discuss criticisms of or potential defects in the firm's system of quality control, those discussions also could eventually be made public, but only to the extent the firm fails to address the criticisms to the Board's satisfaction within 12 months of the issuance of the report.

### PROFILE OF THE FIRM<sup>1</sup>

Number of offices	8 (Montgomery, Alabama; Irvine, Los Angeles, San Diego, and San Mateo, California; LaGrange, Georgia; Fort Lee, New Jersey; and Seoul, Republic of Korea)
Ownership structure	Limited liability partnership
Number of partners	3
Number of professional staff <sup>2</sup>	41
Number of issuer audit clients	None at the outset of the inspection; however, the Firm had issued at least one audit report with respect to an issuer since the preceding inspection

---

<sup>1</sup> The information presented here is as understood by the inspection team, generally as of the outset of the inspection, based on the Firm's self-reporting and the inspection team's review of certain information. Additional information, including additional detail on audit reports issued by the Firm, is available in the Firm's filings with the Board, available at [http://pcaobus.org/Registration/rasr/Pages/RASR\\_Search.aspx](http://pcaobus.org/Registration/rasr/Pages/RASR_Search.aspx).

<sup>2</sup> The number of partners and professional staff is provided here as an indication of the size of the Firm, and does not necessarily represent the number of the Firm's professionals who participate in audits of issuers.

## **PART I**

### **INSPECTION PROCEDURES AND CERTAIN OBSERVATIONS**

Members of the Board's inspection staff ("the inspection team") conducted primary procedures for the inspection from April 28, 2014 to May 2, 2014.<sup>3</sup>

#### **A. Review of Audit Engagement**

The inspection procedures included a review of portions of one issuer audit performed by the Firm. The inspection team identified matters that it considered to be deficiencies in the performance of the work it reviewed.

The descriptions of the deficiencies in Part I.A of this report include, at the end of the description of each deficiency, references to specific paragraphs of the auditing standards that relate to those deficiencies. The text of those paragraphs is set forth in Appendix A to this report. The references in this sub-Part include only standards that primarily relate to the deficiencies; they do not present a comprehensive list of every auditing standard that applies to the deficiencies. Further, certain broadly applicable aspects of the auditing standards that may be relevant to a deficiency, such as provisions requiring due professional care, including the exercise of professional skepticism; the accumulation of sufficient appropriate audit evidence; and the performance of procedures that address risks, are not included in the references to the auditing standards in this sub-Part, unless the lack of compliance with these standards is the primary reason for the deficiency. These broadly applicable provisions are described in Part I.B of this report.

Certain of the deficiencies identified were of such significance that it appeared to the inspection team that the Firm, at the time it issued its audit report, had not obtained sufficient appropriate audit evidence to support its opinion that the financial statements were presented fairly, in all material respects, in accordance with the applicable

---

<sup>3</sup> For this purpose, "primary procedures" includes field work, other review of audit work papers, and the evaluation of the Firm's quality control policies and procedures through review of documentation and interviews of Firm personnel. Primary procedures does not include (1) inspection planning, which is generally performed prior to primary procedures, and (2) inspection follow-up procedures, wrap-up, analysis of results, and the preparation of the inspection report, which generally extend beyond the primary procedures.

financial reporting framework. In other words, in this audit, the auditor issued an opinion without satisfying its fundamental obligation to obtain reasonable assurance about whether the financial statements were free of material misstatement.

The fact that one or more deficiencies in an audit reach this level of significance does not necessarily indicate that the financial statements are misstated. It is often not possible for the inspection team, based only on the information available from the auditor, to reach a conclusion on those points.

Whether or not associated with a disclosed financial reporting misstatement, an auditor's failure to obtain the reasonable assurance that the auditor is required to obtain is a serious matter. It is a failure to accomplish the essential purpose of the audit, and it means that, based on the audit work performed, the audit opinion should not have been issued.<sup>4</sup>

The audit deficiencies that reached this level of significance are described below –

Issuer A

- (1) the failure to perform sufficient procedures to test the occurrence and allocation of revenue, including the inadequate performance of substantive analytical procedures (AS No. 13, paragraph 13 and AU 329, paragraphs .16, .17, .20, and .21); and
- (2) the failure to perform sufficient procedures to test the existence and valuation of inventories (AS No. 13, paragraph 8; AS No.15, paragraph 17; AU 331, paragraph .12; and AU 342, paragraphs .04, .07 and .10).

---

<sup>4</sup> Inclusion in an inspection report does not mean that the deficiency remained unaddressed after the inspection team brought it to the Firm's attention. Depending upon the circumstances, compliance with PCAOB standards may require the Firm to perform additional audit procedures, or to inform a client of the need for changes to its financial statements or reporting on internal control, or to take steps to prevent reliance on its previously expressed audit opinions. The Board expects that firms will comply with these standards, and the inspections staff may include in its procedures monitoring or assessing a firm's compliance.

B. Auditing Standards

Each deficiency described above could relate to several applicable provisions of the standards that govern the conduct of audits, including both the paragraphs of the standards that are cited at the end of each description of the deficiency included in Part I.A of this report and one or more of the specific paragraphs discussed below.

Many audit deficiencies involve a lack of due professional care. AU 230, *Due Professional Care in the Performance of Work* ("AU 230"), paragraphs .02, .05, and .06, requires the independent auditor to plan and perform his or her work with due professional care and sets forth aspects of that requirement. AU 230, paragraphs .07 through .09, and Auditing Standard ("AS") No. 13, *The Auditor's Responses to the Risks of Material Misstatement* ("AS No. 13"), paragraph 7, specify that due professional care requires the exercise of professional skepticism. These standards state that professional skepticism is an attitude that includes a questioning mind and a critical assessment of the appropriateness and sufficiency of audit evidence.

AS No. 13, paragraphs 3, 5, and 8, requires the auditor to design and implement audit responses that address the risks of material misstatement, and AS No. 15, *Audit Evidence* ("AS No. 15"), paragraph 4, requires the auditor to plan and perform audit procedures to obtain sufficient appropriate audit evidence to provide a reasonable basis for the audit opinion. Sufficiency is the measure of the quantity of audit evidence, and the quantity needed is affected by the risk of material misstatement (in the audit of financial statements) and the quality of the audit evidence obtained. The appropriateness of evidence is measured by its quality; to be appropriate, evidence must be both relevant and reliable in support of the related conclusions.

The table below lists the specific auditing standards that are referenced for each deficiency included in Part I.A of this report. See the descriptions of the deficiencies in Part I.A for identification of the specific paragraphs, in addition to those noted above, that relate to the individual deficiencies. Standards discussed above are cited again in the table only if the particular deficiency relates to aspects of the standard that are not discussed above.

PCAOB Auditing Standards	Issuer
<i>AS 13, The Auditor's Responses to the Risks of Material Misstatement</i>	A

<i>AU 331, Inventories</i>	A
<i>AU 342, Auditing Accounting Estimates</i>	A

C. Information Concerning PCAOB Inspections Generally Applicable to Triennially Inspected Firms

Board inspections include reviews of certain portions of selected audit work performed by the inspected firm and reviews of certain aspects of the firm's quality control system. The inspections are designed to identify deficiencies in audits and defects or potential defects in the firm's system of quality control related to the firm's audits. The focus on deficiencies, defects, and potential defects necessarily carries through to reports on inspections and, accordingly, Board inspection reports are not intended to serve as balanced report cards or overall rating tools. Further, the inclusion in an inspection report of certain deficiencies, defects, and potential defects should not be construed as an indication that the Board has made any determination about other aspects of the inspected firm's systems, policies, procedures, practices, or conduct not included within the report.

C.1. Reviews of Audit Work

Inspections include reviews of portions of selected audits of financial statements and, where applicable, audits of internal control over financial reporting ("ICFR"). For these audits, the inspection team selects certain portions of the audits for inspection, and it reviews the engagement team's work papers and interviews engagement personnel regarding those portions. If the inspection team identifies a potential issue that it is unable to resolve through discussion with the firm and any review of additional work papers or other documentation, the inspection team ordinarily provides the firm

with a written comment form on the matter and the firm is allowed the opportunity to provide a written response to the comment form. If the response does not resolve the inspection team's concerns, the matter is considered a deficiency and is evaluated for inclusion in the inspection report.

The inspection team selects the audits, and the specific portions of those audits, that it will review, and the inspected firm is not allowed an opportunity to limit or influence the selections. Audit deficiencies that the inspection team may identify include a firm's failure to identify, or to address appropriately, financial statement misstatements, including failures to comply with disclosure requirements,<sup>5</sup> as well as a firm's failures to perform, or to perform sufficiently, certain necessary audit procedures. The inspection may not involve the review of all of a firm's audits, nor is it designed to identify every deficiency in the reviewed audits. Accordingly, a Board inspection report should not be understood to provide any assurance that a firm's audit work, or the relevant issuers' financial statements or reporting on ICFR, are free of any deficiencies not specifically described in an inspection report.

In some cases, the conclusion that a firm did not perform a procedure may be based on the absence of documentation and the absence of persuasive other evidence, even if the firm claimed to have performed the procedure. AS No. 3, *Audit Documentation* ("AS No. 3") provides that, in various circumstances including PCAOB inspections, a firm that has not adequately documented that it performed a procedure, obtained evidence, or reached an appropriate conclusion, must demonstrate with persuasive other evidence that it did so, and that oral assertions and explanations alone do not constitute persuasive other evidence. In reaching its conclusions, the inspection team considers whether audit documentation or any persuasive other evidence that a firm might provide to the inspection team supports a firm's contention that it performed a

---

<sup>5</sup> When it comes to the Board's attention that an issuer's financial statements appear not to present fairly, in a material respect, the financial position, results of operations, or cash flows of the issuer in conformity with applicable accounting principles, the Board's practice is to report that information to the Securities and Exchange Commission ("SEC" or "the Commission"), which has jurisdiction to determine proper accounting in issuers' financial statements. Any description in this report of financial statement misstatements or failures to comply with SEC disclosure requirements should not be understood as an indication that the SEC has considered or made any determination regarding these issues unless otherwise expressly stated.

procedure, obtained evidence, or reached an appropriate conclusion. In the case of every matter cited in the public portion of a final inspection report, the inspection team has carefully considered any contention by the firm that it did so but just did not document its work, and the inspection team has concluded that the available evidence does not support the contention that the firm sufficiently performed the necessary work.

Identified deficiencies in the audit work that exceed a significance threshold (which is described in Part I.A of the inspection report) are summarized in the public portion of the inspection report.<sup>6</sup>

The Board cautions against extrapolating from the results presented in the public portion of a report to broader conclusions about the frequency of deficiencies throughout the firm's practice. Individual audits and areas of inspection focus are most often selected on a risk-weighted basis and not randomly. Areas of focus vary among selected audits, but often involve audit work on the most difficult or inherently uncertain areas of financial statements. Thus, the audit work is generally selected for inspection based on factors that, in the inspection team's view, heighten the possibility that auditing deficiencies are present, rather than through a process intended to identify a representative sample.

## C.2. Review of a Firm's Quality Control System

QC 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*, provides that an auditing firm has a responsibility to ensure that its personnel comply with the applicable professional standards. This standard specifies that a firm's system of quality control should encompass the following elements: (1) independence, integrity, and objectivity; (2) personnel management; (3) acceptance and continuance of issuer audit engagements; (4) engagement performance; and (5) monitoring.

---

<sup>6</sup> The discussion in this report of any deficiency observed in a particular audit reflects information reported to the Board by the inspection team and does not reflect any determination by the Board as to whether the Firm has engaged in any conduct for which it could be sanctioned through the Board's disciplinary process. In addition, any references in this report to violations or potential violations of law, rules, or professional standards are not a result of an adversarial adjudicative process and do not constitute conclusive findings for purposes of imposing legal liability.

The inspection team's assessment of a firm's quality control system is derived both from the results of its procedures specifically focused on the firm's quality control policies and procedures, and also from inferences that can be drawn from deficiencies in the performance of individual audits. Audit deficiencies, whether alone or when aggregated, may indicate areas where a firm's system has failed to provide reasonable assurance of quality in the performance of audits. Even deficiencies that do not result in an insufficiently supported audit opinion may indicate a defect or potential defect in a firm's quality control system.<sup>7</sup> If identified deficiencies, when accumulated and evaluated, indicate defects or potential defects in the firm's system of quality control, the nonpublic portion of this report would include a discussion of those issues. When evaluating whether identified deficiencies in individual audits indicate a defect or potential defect in a firm's system of quality control, the inspection team considers the nature, significance, and frequency of deficiencies;<sup>8</sup> related firm methodology, guidance, and practices; and possible root causes.

Inspections also include a review of certain of the firm's practices, policies, and processes related to audit quality, which constitute a part of the firm's quality control system. This review addresses practices, policies, and procedures concerning audit performance, training, compliance with independence standards, client acceptance and retention, and the establishment of policies and procedures.

END OF PART I

---

<sup>7</sup> Not every audit deficiency suggests a defect or potential defect in a firm's quality control system.

<sup>8</sup> An evaluation of the frequency of a type of deficiency may include consideration of how often the inspection team reviewed audit work that presented the opportunity for similar deficiencies to occur. In some cases, even a type of deficiency that is observed infrequently in a particular inspection may, because of some combination of its nature, its significance, and the frequency with which it has been observed in previous inspections of the firm, be cause for concern about a quality control defect or potential defect.

## PART II

\* \* \* \*

### B. Issues Related to Quality Controls

The inspection of the Firm included consideration of aspects of the Firm's system of quality control.<sup>9</sup>

#### Audit Performance

A firm's system of quality control should provide reasonable assurance that the work performed on an audit engagement will meet applicable professional standards and regulatory requirements. On the basis of the information reported by the inspection team, including the audit performance deficiencies described in Part II.A (and summarized in Part I.A) and any other deficiencies identified below, the Board has concerns that the Firm's system of quality control fails to provide such reasonable assurance in at least the following respects –

#### a. Testing Appropriate to the Audit

The Firm's system of quality control appears not to provide sufficient assurance that the Firm will conduct all testing appropriate to a particular audit, specifically with respect to the following issues:

#### (i) Occurrence and Allocation of Revenue

As discussed above, in the audit reviewed, the inspection team identified a significant deficiency related to the Firm's testing of the occurrence and allocation of revenue. This information provides cause for concern regarding the Firm's quality control policies and procedures related to the auditing of revenue. [Issuer A]

---

<sup>9</sup> This report's description of quality control issues is based on the inspection team's observations during the primary inspection procedures. Any changes or improvements that the Firm may have made in its system of quality control since that time may not be reflected in this report, but will be taken into account by the Board during the 12-month remediation process following the issuance of this report.

(ii) Existence and Valuation of Inventory

As discussed above, in the audit reviewed, the inspection team identified a significant deficiency related to the Firm's testing of the existence and valuation of inventory. This information provides cause for concern regarding the Firm's quality control policies and procedures related to the auditing of inventory. [Issuer A]

b. Fraud Procedures

The Firm's system of quality control appears not to provide sufficient assurance that the Firm will perform all of the procedures necessary to identify, assess, and respond to the risk of material misstatement due to fraud. Specifically, although the Firm tested a selection of journal entries recorded by the issuer during its year-end financial reporting process, the Firm failed to consider whether there was a need to test journal entries throughout the year under audit instead of limiting its testing to the issuer's year end. In addition, the Firm failed to perform procedures to evaluate the characteristics of fraudulent journal entries in determining which journal entries to select for testing. [Issuer A]

c. Engagement Quality Review

In light of the audit performance deficiencies described in Part II.A (and summarized in Part I.A), questions exist about the effectiveness of the Firm's system of quality control with respect to the execution of engagement quality reviews in compliance with PCAOB Auditing Standard No. 7, *Engagement Quality Review* ("AS No. 7"). An engagement quality review performed with due care in compliance with AS No. 7 should have detected, and resulted in the Firm addressing, each of the deficiencies described in Part II.A. [Issuer A]

\* \* \* \*

**PART IV**

**RESPONSE OF THE FIRM TO DRAFT INSPECTION REPORT**

Pursuant to section 104(f) of the Act, 15 U.S.C. § 7214(f), and PCAOB Rule 4007(a), the Board provided the Firm an opportunity to review and comment on a draft of this report. The Firm did not provide a written response.

## **APPENDIX A**

### **AUDITING STANDARDS REFERENCED IN PART I**

This Appendix provides the text of the auditing standard paragraphs that are referenced in Part I.A of this report. Footnotes that are included in this Appendix, and any other Notes, are from the original auditing standards that are referenced. While this Appendix contains the specific portions of the relevant standards cited with respect to the deficiencies in Part I.A of this report, other portions of the standards (including those described in Part I.B of this report) may provide additional context, descriptions, related requirements, or explanations; the complete standards are available on the PCAOB's website at <http://pcaobus.org/STANDARDS/Pages/default.aspx>.

<b>AS No. 13, <i>The Auditor's Responses to the Risks of Material Misstatement</i></b>		
<b>Responses involving the Nature, Timing, and Extent of Audit Procedures</b>		
AS No. 13.8	The auditor should design and perform audit procedures in a manner that addresses the assessed risks of material misstatement for each relevant assertion of each significant account and disclosure.	Issuer A
<b>Responses to Fraud Risks</b>		
AS No. 13.13	<i>Addressing Fraud Risks in the Audit of Financial Statements.</i> In the audit of financial statements, the auditor should perform substantive procedures, including tests of details that are specifically responsive to the assessed fraud risks. If the auditor selects certain controls intended to address the assessed fraud risks for testing in accordance with paragraphs 16-17 of this standard, the auditor should perform tests of those controls.	Issuer A
<b>AS No. 15, <i>Audit Evidence</i></b>		
<b>Inquiry</b>		
AS No. 15.17	Inquiry consists of seeking information from knowledgeable persons in financial or nonfinancial roles within the company or outside the company. Inquiry may be performed throughout the audit in addition to other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries. Evaluating responses to inquiries is an integral part of the inquiry process. <sup>9</sup>  Note: Inquiry of company personnel, by itself, does not provide sufficient	Issuer A

	audit evidence to reduce audit risk to an appropriately low level for a relevant assertion or to support a conclusion about the effectiveness of a control.	
<u>Footnote to AS No. 15.17</u>		
<p><sup>9</sup> AU sec. 333, <i>Management Representations</i>, establishes requirements regarding written management representations, including confirmation of management responses to oral inquiries.</p>		
<b>AU 329, <i>Substantive Analytical Procedures</i></b>		
<b>Availability and Reliability of Data</b>		
AU 329.16	<p>Before using the results obtained from substantive analytical procedures, the auditor should either test the design and operating effectiveness of controls over financial information used in the substantive analytical procedures or perform other procedures to support the completeness and accuracy of the underlying information. The auditor obtains assurance from analytical procedures based upon the consistency of the recorded amounts with expectations developed from data derived from other sources. The reliability of the data used to develop the expectations should be appropriate for the desired level of assurance from the analytical procedure. The auditor should assess the reliability of the data by considering the source of the data and the conditions under which it was gathered, as well as other knowledge the auditor may have about the data. The following factors influence the auditor's consideration of the reliability of data for purposes of achieving audit objectives:</p> <ul style="list-style-type: none"> <li>• Whether the data was obtained from independent sources</li> </ul>	Issuer A

	<p>outside the entity or from sources within the entity</p> <ul style="list-style-type: none"> <li>• Whether sources within the entity were independent of those who are responsible for the amount being audited</li> <li>• Whether the data was developed under a reliable system with adequate controls</li> <li>• Whether the data was subjected to audit testing in the current or prior year</li> <li>• Whether the expectations were developed using data from a variety of sources</li> </ul>	
<p><b>Precision of the Expectation</b></p>		
<p>AU 329.17</p>	<p>The expectation should be precise enough to provide the desired level of assurance that differences that may be potential material misstatements, individually or when aggregated with other misstatements, would be identified for the auditor to investigate (see paragraph .20). As expectations become more precise, the range of expected differences becomes narrower and, accordingly, the likelihood increases that significant differences from the expectations are due to misstatements. The precision of the expectation depends on, among other things, the auditor's identification and consideration of factors that significantly affect the amount being audited and the level of detail of data used to develop the expectation</p>	

<b>Investigation and Evaluation of Significant Differences</b>		
AU 329.20	<p>In planning the analytical procedures as a substantive test, the auditor should consider the amount of difference from the expectation that can be accepted without further investigation. This consideration is influenced primarily by materiality and should be consistent with the level of assurance desired from the procedures. Determination of this amount involves considering the possibility that a combination of misstatements in the specific account balances, or class of transactions, or other balances or classes could aggregate to an unacceptable amount.</p>	Issuer A
AU 329.21	<p>The auditor should evaluate significant unexpected differences. Reconsidering the methods and factors used in developing the expectation and inquiry of management may assist the auditor in this regard. Management responses, however, should ordinarily be corroborated with other evidential matter. In those cases when an explanation for the difference cannot be obtained, the auditor should obtain sufficient evidence about the assertion by performing other audit procedures to satisfy himself as to whether the difference is a misstatement. In designing such other procedures, the auditor should consider that unexplained differences may indicate an increased risk of material misstatement. (See Auditing Standard No. 14, <i>Evaluating Audit Results</i>.)</p>	Issuer A

<b>AU 331, Inventories</b>		
AU 331.12	<p>When the independent auditor has not satisfied himself as to inventories in the possession of the client through the procedures described in paragraphs .09 through .11, tests of the accounting records alone will not be sufficient for him to become satisfied as to quantities; it will always be necessary for the auditor to make, or observe, some physical counts of the inventory and apply appropriate tests of intervening transactions. This should be coupled with inspection of the records of any client's counts and procedures relating to the physical inventory on which the balance-sheet inventory is based.</p>	Issuer A
<b>AU 342, Auditing Accounting Estimates</b>		
AU 342.04	<p>The auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements taken as a whole. As estimates are based on subjective as well as objective factors, it may be difficult for management to establish controls over them. Even when management's estimation process involves competent personnel using relevant and reliable data, there is potential for bias in the subjective factors. Accordingly, when planning and performing procedures to evaluate accounting estimates, the auditor should consider, with an attitude of professional skepticism, both the subjective and objective factors.</p>	Issuer A

<b>Evaluating Accounting Estimates</b>		
AU 342.07	<p>The auditor's objective when evaluating accounting estimates is to obtain sufficient appropriate evidential matter to provide reasonable assurance that—</p> <ul style="list-style-type: none"> <li>a. All accounting estimates that could be material to the financial statements have been developed.</li> <li>b. Those accounting estimates are reasonable in the circumstances.</li> <li>c. The accounting estimates are presented in conformity with applicable accounting principles and are properly disclosed.<sup>3</sup></li> </ul>	Issuer A
<p><u>Footnote to AU 342.07</u></p> <p><sup>3</sup> See paragraph 31 of Auditing Standard No. 14, <i>Evaluating Audit Results</i>.</p>		
<b>Evaluating Reasonableness</b>		
AU 342.10	<p>In evaluating reasonableness, the auditor should obtain an understanding of how management developed the estimate. Based on that understanding, the auditor should use one or a combination of the following approaches:</p> <ul style="list-style-type: none"> <li>a. Review and test the process used by management to develop the estimate.</li> <li>b. Develop an independent expectation of the estimate to corroborate the reasonableness</li> </ul>	Issuer A

	<p>of management's estimate.</p> <p>c. Review subsequent events or transactions occurring prior to the date of the auditor's report.</p> <p>Note: When performing an integrated audit of financial statements and internal control over financial reporting, the auditor may use any of the three approaches. However, the work that the auditor performs as part of the audit of internal control over financial reporting should necessarily inform the auditor's decisions about the approach he or she takes to auditing an estimate because, as part of the audit of internal control over financial reporting, the auditor would be required to obtain an understanding of the process management used to develop the estimate and to test controls over all relevant assertions related to the estimate.</p>
